measurement of the NMR signal is applied or not in combination with the remaining limitations of the claim.

b. With respect to claim 9, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest in an NMR apparatus comprising a second RF power application means for during periods complementary to the period the first power application means is active, applying RF power of a frequency not affecting measurement of the NMR signal to the RF irradiation coil, wherein the total amount of RF power applied to the coil is controlled to be almost constant irrespective of whether the RF power of the frequency necessary for the measurement of the NMR signal is applied or not in combination with the remaining limitations of the claim.

c. With respect to claims 2, 3, 10, 11, 15 and 16, the claims have been found allowable due to their dependency on claims 1 and 9 above.
